How to Refer to (“cite”) an Air Rule

The Indiana Administrative Code (“IAC”) is a collection of the rules of various State of Indiana boards and agencies. Each board/agency has been assigned a unique identifier (a Title number) for its rules. The rules of the Indiana Air Pollution Control Board (APCB) are located at Title 326 of the IAC.

Each Title is further subdivided into Articles, Rules, and Sections. For instance, the citation:

326 IAC 2-7-15

refers to the requirements found at Title 326, Article 2, Rule 7, Section 15 of the Indiana Administrative Code.

The Table of Contents to this Volume is useful in understanding the organization of the Air Rules. It may serve as an outline of the rules. The requirements of 326 IAC 2-7-15, for instance, are located under the following hierarchy:

Title 326 Rules of the APCB
Article 2 Permit Review Rules
Rule 7 Part 70 Permit Program
Sec. 15 Permit Shield

About This Volume

This 2002 INDIANA ENVIRONMENTAL RULES: AIR volume contains the rules of the Indiana Air Pollution Control Board.

The 2002 Edition volume includes all applicable air rule changes published in the *Indiana Register* through December 1, 2001.

The Indiana Air Pollution Control Board meets monthly. Its main function is rulemaking — adopting new air rules and amending or repealing existing rules. Making changes to the rules involves a lengthy procedural process which generally takes twelve to eighteen months. You are advised when using this volume always to check both that the text of a rule upon which you are relying is the most current version, and that new or additional requirements have not been imposed.* Further, you are advised to keep aware of new rules or rule changes under development or in the process of promulgation which may affect you at a later date.

The complete and recodified rules of the Indiana Air Pollution Control Board were published in the April 1, 1988 issue of the *Indiana Register*, beginning at 11 IR 2368. These recodified air rules, and all current amendments and additions to these rules contained in subsequent issues of the *Indiana Register* (through the December 1, 2001 issue) have been incorporated into this 2002 Edition. The changes can be identified because the text of each such amended or new section is followed by a “history line” or “citation line,” indicating the source of the post-April 1, 1988 language. If a section has not been changed since the 1988 date, it will have no history line. If a section has been repealed, it is not included in this volume.

Errata. Errors included in rules published in the *Indiana Register* have not been corrected unless these errors were officially corrected by a “notice of errata” published in the *Indiana Register* (through the December 1, 2001 issue). Any such official corrections have been incorporated into the text; such corrections are not referenced in the history lines. Uncorrected errors may be noted by “[sic.]”

*Availability of updated rule information: To assist you in checking that the text of a rule as published in this volume is the most recent version (i.e., that it has not been amended or repealed subsequent to December 1, 2001, which is the cut-off date for inclusion in this 2002

Air Rules volume), the Indiana Department of Environmental Management has posted Update Tables on its website. These Tables will be revised monthly.

Readopted rules. Pursuant to Indiana Code 13-14-9.5 (commonly referred to as the “Sunset” provision), a law which provides for the expiration and readoption of administrative rules, all Indiana environmental rules (with specified exceptions) will expire on January 1 of the seventh year after the year in which the rule takes effect, unless readopted. Rules may be readopted pursuant to the publication of a general Notice of Readoption in the *Indiana Register* if no comments are received requesting a closer look at the rule. Rules for which specific review is sought must pass through the general rulemaking process. The history lines in this compilation do not indicate whether a rule has been readopted. However, if a rule is amended during the course of readoption, the history line will reflect the amendment and if a rule is repealed as a result of the review, the provision will be removed from this compilation.

Any errors that may be discovered to have occurred in the publication of this volume also will be posted at this location.

Sections Affected During 2000

How does this new 2002 edition of the Air Rules differ from the last (through December 1, 2000) edition? The following table lists the differences. The table lists the sections of this volume, *2002 Edition of Indiana Environmental Rules: Air*, that were added (“N” = new), amended (“A” = amended) or repealed (“R” = repealed) as a result of rulemaking actions of the Indiana Air Pollution Control Board, and published as “final rules” in the *Indiana Register* during the period from January 1, 2001 through December 1, 2001.
